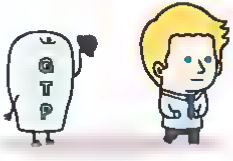
Cyber Love



Two years ago, Mev quit working in a secondary school.

He moved to a college

So now he is working
as a mathematics teacher
in the college.

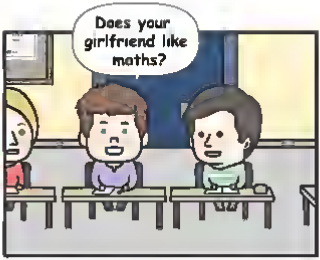
He is still very busy as before

However, luckily, he is working with more joy than before.

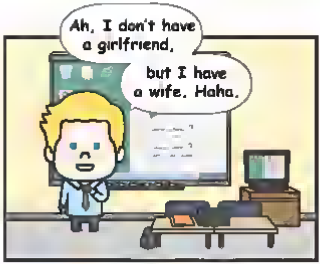
I sometimes hear funny happenings in his class

I heard this story recently.

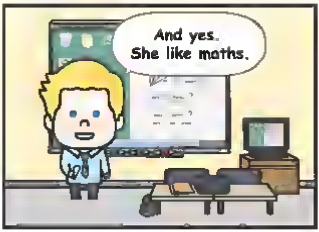
"In the class, someone asked me."



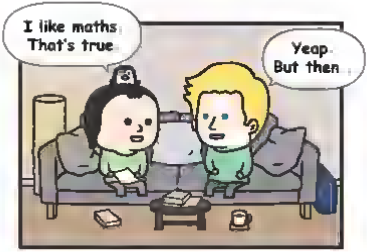
Does your girlfriend like maths?



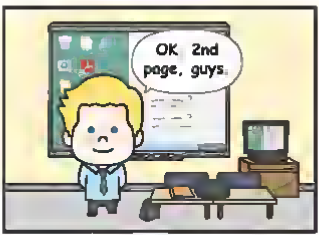
Ah, I don't have a girlfriend,
but I have a wife. Haha.



And yes.
She like maths.



I like maths.
That's true.
Yeap.
But then.



.. while they were working on the worksheet,
I walked around the students.

Whispering
Whispering

Do you know what I could hear them whispering?

Whispering
Whispering
It's a computer

Haha haha

Oh, man~
